Installation Guide

PLUMBER REQUIRED AS/NZS 3500

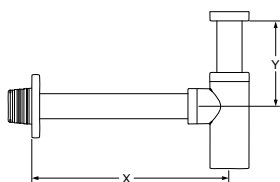

01

Check Measurements

Confirm the position of the waste outlet under the basin. Measure the required distance from the wall to the bottle trap and ensure the outlet is positioned correctly.

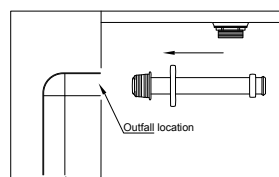

02

Check Pipe Length

Check the required length of the horizontal outlet pipe and the height of the bottle trap according to the measurements shown in the picture.

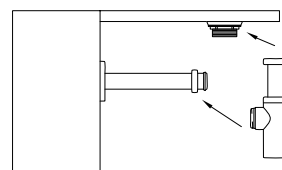

03

Connect Outlet Pipe

Remove the horizontal outlet pipe from the bottle trap. Connect the pipe to the wall waste outlet and make sure it is positioned correctly.

04

Install Bottle Trap

Connect the bottle trap body to the horizontal outlet pipe and basin waste. Tighten all connections securely and check for any leaks.

INSTALLATION GUIDE

Ensure all components are ready before starting installation. Check the position of the waste outlet and confirm the required measurements before installing the bottle trap.

Care & Maintenance

MILD SOAP & WARM WATER

Clean with mild soap and warm water.

SOFT CLOTH ONLY

Use soft cloth only.

NO CITRUS, BLEACH OR ABRASIVE CLEANERS

These can damage the surface and affect longevity
